

1. What did we learn this week?

We spent the week learning about classes, particularly about inheritance with child classes. Also how do you method override. A child class might want the same method to do different things compared to the parent class who is general. We also focused on extending already existing classes, like for errors.

2. Rate your understanding of the topics this week. (1. Did not understand at all, ... 5. Fully understand the topic)

5

3. Are there any questions related to this week's topics? We will address the questions either at the beginning of a lab or through a post.

No questions.
